RE: US EPA Reg II – Tidewater Baling Site – RCRA/TSCA Debris

To whom it may concern:

Please add “railroad ties” to the current profile submitted for debris from the site, classified as RCRA-D008, TSCA-PCB>50ppm. The ties are typically 8-10 feet in length and some will be in pieces.

Please contact Kim Swann of Capitol Environmental Services, Inc. if you have any questions.

Regards,

Bobby Dease
OSC EPA Region II
